

18

REDUCE HARMFUL INCENTIVES BY AT LEAST \$500 BILLION PER YEAR, AND SCALE UP POSITIVE INCENTIVES FOR BIODIVERSITY

Eliminate harmful subsidies and increase incentives that support biodiversity conservation and sustainable use.

19

MOBILIZE \$200 BILLION PER YEAR FOR BIODIVERSITY FROM ALL SOURCES, INCLUDING \$30 BILLION THROUGH INTERNATIONAL FINANCE

Increase biodiversity financing from public, private and international sources to support global

20

STRENGTHEN CAPACITY-BUILDING, TECHNOLOGY TRANSFER, AND SCIENTIFIC AND TECHNICAL COOPERATION FOR BIODIVERSITY

Promote scientific cooperation, technology transfer and innovation for biodiversity conservation.

21

ENSURE THAT KNOWLEDGE IS AVAILABLE AND ACCESSIBLE TO GUIDE BIODIVERSITY ACTION

Improve access to biodiversity data, research, education and traditional knowledge for informed decision-making.

22

ENSURE PARTICIPATION IN DECISION-MAKING AND ACCESS TO JUSTICE AND INFORMATION RELATED TO BIODIVERSITY FOR ALL

Promote equitable participation, access to information and protection of environmental human rights defenders.

23

ENSURE GENDER EQUALITY AND A GENDER-RESPONSIVE APPROACH FOR BIODIVERSITY ACTION

Support equal participation, leadership and opportunities for women and girls in biodiversity conservation and decision-making.

**EVERYONE HAS A ROLE.
EVERYONE HAS AN IMPACT.**

Living in harmony with nature
by 2030

**INTERNATIONAL DAY
FOR BIODIVERSITY 2026**
Acting locally for global impact

THE KUNMING-MONTREAL GLOBAL BIODIVERSITY FRAMEWORK (KMGBF)

23 global targets to halt and reverse biodiversity loss and put nature on a path to recovery by 2030

1 PLAN AND MANAGE ALL AREAS TO REDUCE BIODIVERSITY LOSS

Ensure that all areas are under participatory, integrated, and biodiversity inclusive spatial planning and/or effective management.

2 RESTORE 30% OF ALL DEGRADED ECOSYSTEMS

Ensure that by 2030 at least 30 per cent of degraded ecosystems are under effective restoration.

3 CONSERVE 30% OF LAND, WATERS AND SEAS

Ensure and enable at least 30 per cent of Earth's land, inland waters, coast and oceans are effectively conserve and manage.

4 HALT SPECIES EXTINCTION, PROTECT GENETIC DIVERSITY, AND MANAGE HUMAN-WILDLIFE CONFLICTS

Take urgent action to prevent extinction of threatened species and conserve genetic diversity while reducing human-wildlife conflict.

5 ENSURE SUSTAINABLE, SAFE AND LEGAL HARVESTING AND TRADE OF WILD SPECIES

Promote sustainable use and trade of wild species while preventing overexploitation and protecting ecosystems.

6 REDUCE THE INTRODUCTION OF INVASIVE ALIEN SPECIES BY 50% AND MINIMIZE THEIR IMPACT

Prevent and control invasive alien species and reduce their introduction and impacts on biodiversity by at least 50 per cent.

7 REDUCE POLLUTION TO LEVELS THAT ARE NOT HARMFUL TO BIODIVERSITY

Reduce pollution from nutrients, pesticides, chemicals and plastics to levels that are not harmful to biodiversity.

8 MINIMIZE THE IMPACTS OF CLIMATE CHANGE ON BIODIVERSITY AND BUILD RESILIENCE

Strengthen ecosystem resilience through climate mitigation, adaptation and nature-based solutions.

9 MANAGE WILD SPECIES SUSTAINABLY TO BENEFIT PEOPLE

Ensure sustainable use of wild species to provide environmental, social and economic benefits for communities.

10 ENHANCE BIODIVERSITY AND SUSTAINABILITY IN AGRICULTURE, AQUACULTURE, FISHERIES, AND FORESTRY

Apply biodiversity-friendly practices in farming, fisheries, aquaculture and forestry for long-term sustainability.

11 RESTORE, MAINTAIN AND ENHANCE NATURE'S CONTRIBUTIONS TO PEOPLE

Protect ecosystem services such as clean air, water, pollination, climate regulation and disaster protection.

12 ENHANCE GREEN SPACES AND URBAN PLANNING FOR HUMAN WELL-BEING AND BIODIVERSITY

Increase access to quality green and blue spaces in urban areas to improve biodiversity and human well-being.

13 INCREASE THE SHARING OF BENEFITS FROM GENETIC RESOURCES, DIGITAL SEQUENCE INFORMATION AND TRADITIONAL KNOWLEDGE

Ensure equitable sharing of benefits arising from genetic resources, digital sequence information and traditional knowledge.

14 INTEGRATE BIODIVERSITY IN DECISION-MAKING AT EVERY LEVEL

Mainstream biodiversity into policies, planning, regulations and development processes across all sectors.

15 BUSINESSES ASSESS, DISCLOSE AND REDUCE BIODIVERSITY-RELATED RISKS AND NEGATIVE IMPACTS

Encourage businesses to assess, disclose and reduce biodiversity-related risks and negative impacts.

16 ENABLE SUSTAINABLE CONSUMPTION CHOICES TO REDUCE WASTE AND OVERCONSUMPTION

Reduce food waste, overconsumption and waste generation while promoting sustainable lifestyles.

17 STRENGTHEN BIOSAFETY AND DISTRIBUTE THE BENEFITS OF BIOTECHNOLOGY

Improve biosafety measures and ensure the safe use and fair distribution of biotechnology benefits.
